

## **Supremasea Working on More Skincare Formulations**

*Supremasea is working on more skincare formulations to be launched in the next few weeks*

October 12, 2017 (FPRC) -- Supremasea has said that it's in the final steps before launching a range of new skincare formulations that will be released over the next few weeks. This comes barely a year after the firm said that it had kickstarted intensive research activities at its Dead Sea factory. Apparently, Supremasea is looking to establish itself as the top provider of skincare products in the market today. The firm has over the last few years unveiled some of its most popular products in the UK, Germany, Italy, Spain, and other market locations outside its traditional American market base.

Supremasea is a sub-brand of Thermalabs that was launched back in 2014. It creates top-quality skincare formulations based on Dead Sea salts and mineral salts. In addition to Supremasea, other sub-brands that are owned by Thermalabs include Organic Healthcare, Tent World, and Thermalabs Air. Organic Healthcare is the firm's brand that is responsible for creating organic health products based on 100% bio-organic ingredients. Tent World is the firm's branch that creates top-quality beach and outdoor tents, while Thermalabs Air is a division of Thermalabs that produces airbrushing machines and airbrushing accessories.

Ever since it was incepted back in mid-2014, Supremasea has managed to furnish the market with at least four top-quality products. These include its Tan Enhancer lotion, the Vanilla Patchouli and Lavender exfoliators, as well as its Shea Body Butter. Supremasea's pilot product, the Tan Enhancer, was a major hit in the market. This was a lotion product that was designed to maintain that radiant glow after a tan. The lotion also doubled up as a moisturizer and protected the skin from free radicals and environmental pollutants.

Both the Vanilla Patchouli and Lavender body scrubs are exfoliation products that are designed from a special regimen of Dead Sea salts and conventional skincare ingredients. Both these products help exfoliate the skin before or after tanning and are ideal for people who are looking for natural, chemical-free exfoliators. The Shea Body Butter is an all-purpose, triple-moisture lotion that has healing properties. The product is formulated from a blend of Dead Sea mineral salts, Avocado Oils, Sweet Almond Oils, Coconut Oils, and Shea Butter. It can be used on all skin types but is especially recommended for individuals who have common skin problems such as wrinkles and dry skin.

Kristina Meyers, the brand manager in charge at Supremasea, has said that her company is in the final steps before launching new products. Ms. Meyers has said that her company's upcoming products are going to be a game-changer in the market.
