

## **Glasgow Carpet Cleaning Specialists Renews All Their Professional Carpet Cleaning Equipment**

*As a quality carpet cleaning company who deliver great results, Glasgow Carpet Cleaning Specialists decided to keep ahead of the competition and that they needed to invest in up-to-date state of the art cleaning equipment.*

August 16, 2019 (FPRC) --

Glasgow Carpet Cleaning Specialists renews all their professional carpet cleaning equipment

Clients can now expect a faster service but no downgrading of the high standards we set.

William and Derek at Glasgow Carpet Cleaning Specialists, the West Of Scotland Carpet Cleaning Professionals have decided that during August 2019 is the right time to make a massive investment in new equipment to service their clients even better than before.

As a quality carpet cleaning company who deliver great results, Glasgow Carpet Cleaning Specialists decided to keep ahead of the competition and that they needed to invest in up-to-date state of the art cleaning equipment.

This allows carpets, rugs and upholstery to be cleaned faster, deeper and to dry much quicker than most of the machines on the market today.

“Our customers – both old and new – will be able to get their carpets and upholstery cleaned much faster than before. They will also be able to walk on them in just a few hours after they have been cleaned” said William Stewart, owner of Glasgow Carpet Cleaning Specialists.

With an ever expanding client base of both commercial and domestic customers, Glasgow Carpet Cleaning Specialists took the decision to invest over £30,000 in new equipment. “This will also help our workers as the new equipment cleans carpets at almost twice the speed of the equipment we used up till now” added William. Something I am sure they will welcome.

Glasgow Carpet Cleaning Specialists have over 20 years experience in the carpet cleaning business and cover the West of Scotland for domestic and commercial cleaning. The work force all welcome the new equipment which will be in use from the middle of August 2019. All personal have been fully trained in the use of this equipment and they all are fully insured and motivated to make the best of each job that comes their way.

Should you wish to contact the company please use and of the details below to do so.
