

Universal Solar Direct Joins Hands With GivePower in Their Flagship Charities

Universal Solar Direct has decided to associate with GivePower for the betterment of everyone around them and the ecological system that we live in.

October 29, 2021 (FPRC) -- The biggest purpose is that of strengthening the fabric of humanity that we all are tied to. Universal Solar Direct feels that it has a critical responsibility to fulfill towards society. It is also their moral duty to support others who are in need. This sentiment has enabled them to give back to the community with all their heart and soul.

'The goal of this partnership is to change the world for the better. Just talking about working for others is not going to help. Universal Solar Direct realized that and this was the reason that we have associated with GivePower in several of their endeavors aimed at making the world a better place for generations across continents.' - Universal Solar Direct Team

Universal Solar Direct is proud to be a part of a platform that is internationally recognized and well known for being a source of support for millions of people across the globe.

Universal Solar Direct believes in giving back to society as much as you take from it by supporting the charity that you believe in. It is your sense of obligation and the will to bring about a positive change in the lives of people around you that drive you towards these efforts.

Universal Solar Direct has chosen to donate to various projects in GivePower 's portfolio. Having the power to give someone the quality of life they have always dreamt of is a once-in-a-lifetime opportunity. Working towards improving the lives of others fills you with a sense of accomplishment.

Universal Solar Direct found its calling in the very successful project of GivePower that it had carried out in Nepal. By providing solar energy to local fishermen, the organization had taken a giant leap towards the betterment of its citizens.

Another project that spoke directly to Universal Solar Direct was the Virunga National Park project in the Democratic Republic of Congo. It was an exemplary initiative in 2016 where GivePower installed 3 micro-grids to enable communication across the region. It also facilitated electric cooking and reduced the citizens' dependence on wood and charcoal.

Spread the word! Universal Solar Direct and GivePower believe in spreading the word and inspiring others to do as much as they can for people in need. We all are the children of mother earth and the sooner we realize it the better it is for all of us.
